ACCESSIBILITY

Carla Prat, Anna Pujol and Judit Vidal

THE OBJECTIVE OF THE TASK

The purpose of this task is to explore at least 4 of the accessibility features available of iOS and answer some questions

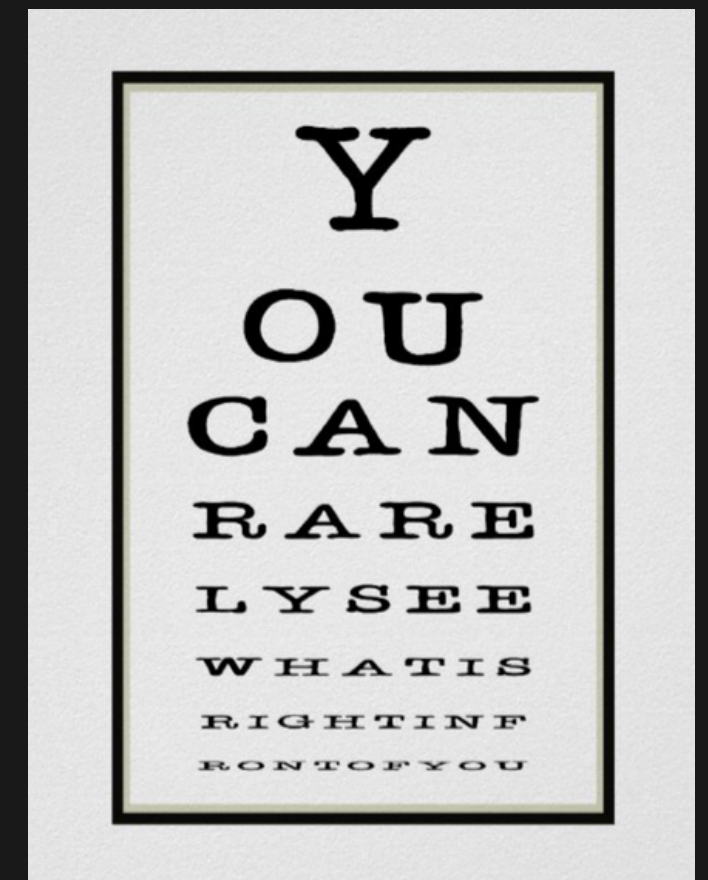

LARGER TEXT SIZES

IOS ACCESSIBILITY GIVES YOU THE OPTION TO CHOOSE THE SIZE OF THE TEXT THAT APPEARS IN YOUR DEVICE. YOU CAN CHOOSE IT BETWEEN DIFFERENT LARGER FONT OPTIONS

This accessibility option is related to the four accessibility principles: it is perceptible to one sense (visual), everyone can use it and it is operable, the information and the interaction is understandable and its uses are well described (strong)

This feature can be very useful to people with visual problems or with someone with a learning difficulty such as dyslexia

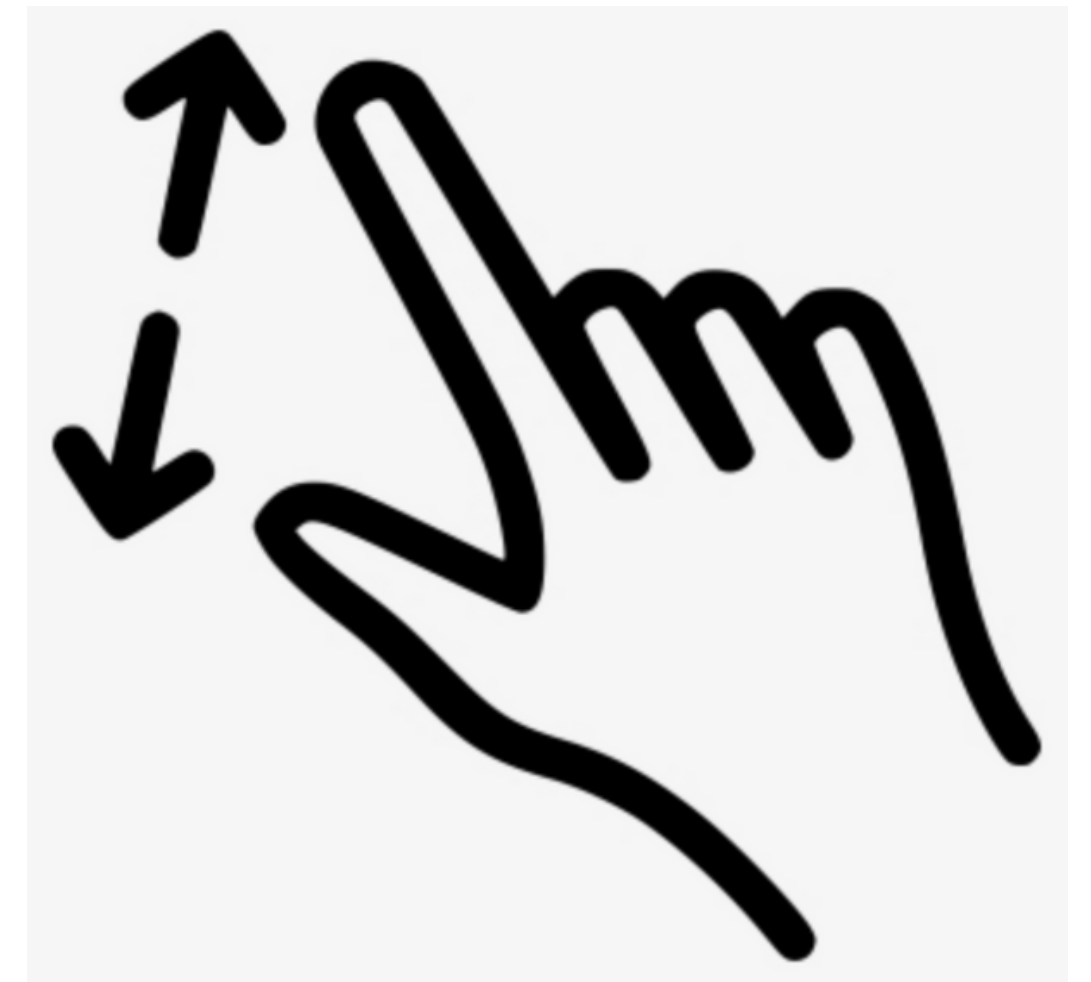

ZOOM

It is possible to increase the content that appears on your screen. It could be useful if, for example, you want to see something more clear on an image

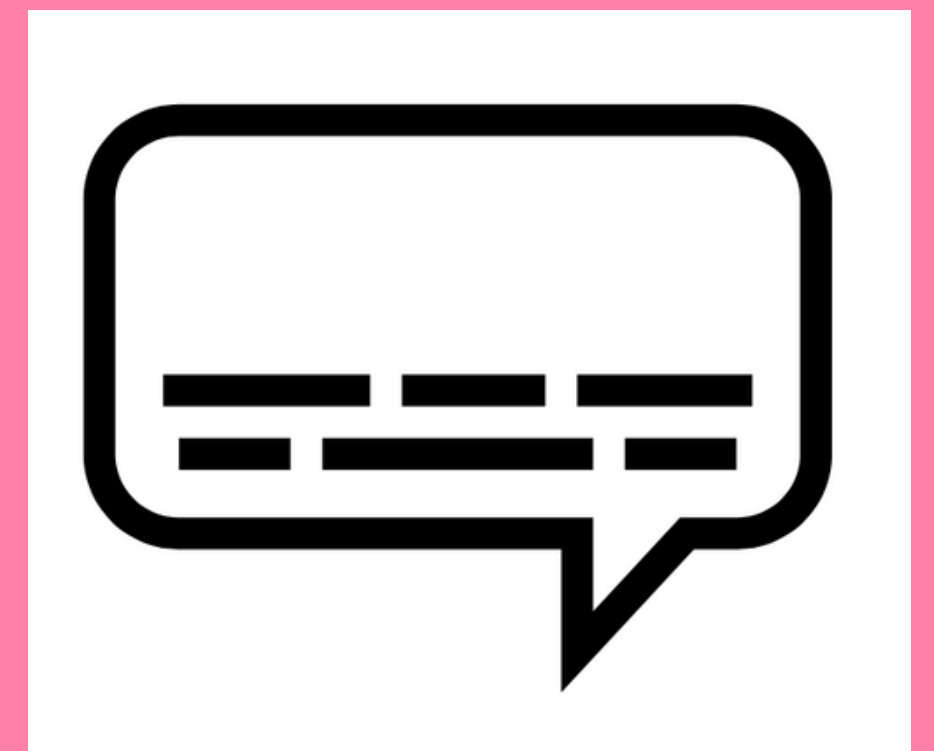

It is formed by the first principle as it is perceptible at the visual sense. Also, everyone can do the interaction needed to use it and the content is easy to understand, as well as the information is strong

SUBTITLES & CAPTIONING

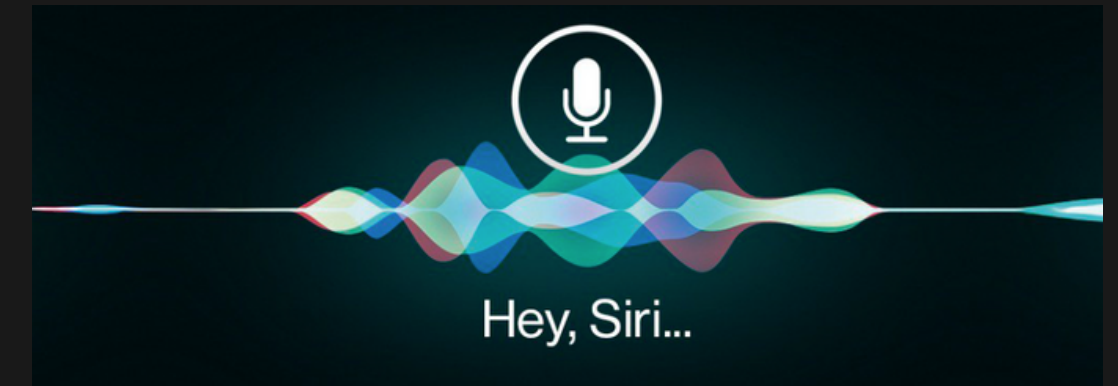

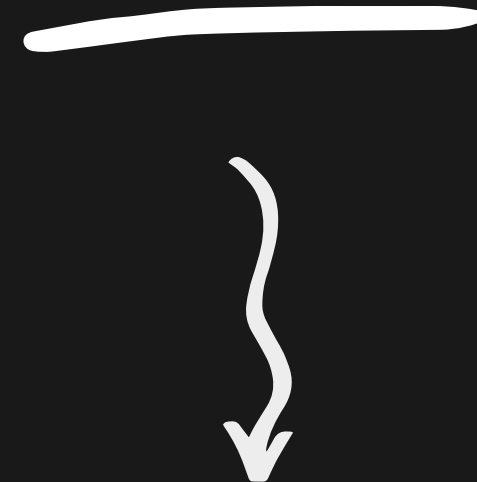

IOS ALLOWS YOU
TO ADD SUBTITLES
AND CAPTIONING IN
DIFFERENT VIDEOS,
PICTURES AND
APPLICATIONS. IT IS
A GOOD OPTION TO
BE USED FOR THOSE
WHO HAVE
PROBLEMS IN
HEARING

This accessibility feature follows the four principles and guidelines of accessibility regulation, as it is perceptible, operable, understandable and strong. Like that, the access to the contents is guaranteed

SIRI

This accessibility gives you help in everything you need to do or to find in your device. You just have to say “Siri” and ask what you want and it will answer you. For instance, it is a good idea to use it while driving, so that you do not need to use your hands if you want to do something with your mobile phone

Siri also follows the four accessibility principles to guarantee the access to the contents to everybody. It is perceptible to more than one sense (visual and auditory), everyone with this operating system can use it, the contents are understandable and the information is strong
